

How To Make A Simple Wire Wrapped Bead Pendant

Courtesy of *Jeweltailor.com*

Wire wrapping is great for adding interest to designs and this project can be recreated using a wide range of beads. In this simple project we show you how you can transform 8mm glass beads into a stylish pendant using wire as the adhesive!

Before you begin, please ensure that you are sitting comfortably with adequate lighting and everything you need is close to hand.

Instructions

STEP 1:
Thread a bead
onto 8 inches of
Jeweltailor 0.8mm
"Stay Bright" wire

Stem wire

STEP 2:
Take the wire up and over the bead
and wrap it around the stem
wire 2 or 3 times.

STEP 3:
Add on another bead
and wrap the wire around it
and then around the stem
as before.

STEP 4:
When all beads have been
wrapped, trim the excess
wire so that only the stem
remains.

STEP 5:
Thread on your spiral bead then,
using round nose pliers,
make a wrapped or simple loop
at the top and trim any excess wire.

Jeweltailor

STEP 6:
Add a necklace
bail, thread on
silver chain and
your necklace is
complete.
